## ARVARD DINING TABLE

### ABOUT THE MANUFACTURED PRODUCT:

This product was crafted from solid walnut wood through an artisan, eco-friendly process without the use of chemicals, achieving the highest expression of true cabinetmaking. A natural oil was applied for an open-pore finish, which allows the wood to breathe while enhancing its natural characteristics.

### CARE AND RECOMMENDATIONS:

The product must be kept free from prolonged moisture or outdoor environments. It is essential that the final product is kept away from contaminating agents—such as other objects affected by pests—and from low-quality woods prone to infection.

- Do not use water or damp cloths to clean the wood.
- Use natural wood oil to moisturize the natural wood.
- The customer is responsible for any damage to the product resulting from improper care or misuse.

### ASSEMBLY:

Remove the two white screws from the two small bases. Then place the large base over the small ones so that it fits perfectly. Reinsert the crossbar that came loose and secure points A and B again. Next, fasten the screws at points E and F. Please note that the longer screw corresponds to the bottom part and the shorter one to the top. Then secure the top in alphabetical order, and your table will be ready to use.
