MAGH CHAIR

ABOUT THE MANUFACTURED PRODUCT:

This chair was crafted from solid walnut wood through an artisan, eco-friendly process without the use of chemicals, achieving the highest expression of true cabinetmaking. A natural oil was applied for an open-pore finish, which allows the wood to breathe while enhancing its natural characteristics. Furthermore, the product is upholstered with a fluid-resistant fabric that is highly stain-resistant and extremely easy to clean.

CARE AND RECOMMENDATIONS:

The product must be kept free from prolonged moisture or outdoor environments. It is essential that the final product is kept away from contaminating agents—such as other objects affected by pests—and from low-quality woods prone to infection.

- Do not use water or damp cloths to clean the wood.
- Use a specialized soap to clean the fabric.
- Use natural wood oil to moisturize the natural wood.
- The customer is responsible for any damage to the product resulting from improper care or misuse.

ASSEMBLY:

Look for the letter markings on each piece. Connect the pieces in alphabetical order. Once this is done, insert the screw to secure them. Ensure the screw fits into the guide hole so the product is properly fastened. Please tighten the screw correctly to prevent the product from being damaged over time.
