## ESTAMBUL SOFA

### ABOUT THE MANUFACTURED PRODUCT:

This Sofa was crafted from solid walnut wood through an artisan, eco-friendly process without the use of chemicals, achieving the highest expression of true cabinetmaking. A natural oil was applied for an open-pore finish, which allows the wood to breathe while enhancing its natural characteristics. Furthermore, the product is upholstered with a fluid-resistant fabric that is highly stain-resistant and extremely easy to clean.

### CARE AND RECOMMENDATIONS:

The product must be kept free from prolonged moisture or outdoor environments. It is essential that the final product is kept away from contaminating agents—such as other objects affected by pests—and from low-quality woods prone to infection.

- Do not use water or damp cloths to clean the wood.
- Use a specialized soap to clean the fabric.
- Use natural wood oil to moisturize the natural wood.
- The customer is responsible for any damage to the product resulting from improper care or misuse.

### ASSEMBLY:

Attach the 4 legs to the base from the underside. Next, position one side panel onto the base and secure it using the metal corner brackets (L) against the base. Then, place the headboard so it fits perfectly and fasten it to the side panel with the drywall screws (tighten the screws firmly). Finally, fit the remaining side panel into place, secure it with the metal corner brackets (L), and lastly, fasten the headboard to this second side panel using the drywall screws.
